

Scar Detox Program - Definitions

Terms and definitions are not in alphabetical order, but in the order that is important for the definition to understand the terms to follow.

1. **Abbreviations** – are provided on the **Skin Target Schedule** and **Skin Target Schedule – How To Interpret documents**.
2. **Castor Oil and Castor Oil Immune Packs** – When the CO or COI column is checked on the Skin Target Schedule, this means to apply either the Castor Oil (CO) or Castor Oil Immune (COI) Pack over the Detox Organs and any other area indicated, after using the Mineral Packs on them. Detox Organs are the Liver, Kidneys and Intestines. If you did not receive a document for Castor Oil instructions, then this part of the program does not apply to you.
3. **Mineral Mud or Mineral Mud Pack**– this represents the mineral paste that results from mixing the specific products to be used on the scars, tattoos, vaccination puncture sites and detox organs. When reading this document, **“Medi-Body Pack – Bath – Soak Instructions,”** mineral mud refers to the products discussed in this document; when reading the **Vaccination Detoxification Procedures**, mineral mud represents the products discussed in that document.
4. **Mineral Pack or Packing** – this represents “mineral mud” also, but is used when the mineral mud is referred to “generally.” In other words, mineral pack(s) or packing may refer to the mineral mud of the Medi-Body Pack products, Vaccination Detoxification products or the Castor Oil products.
5. **Downloads, Downloading, Uploading** – A brief definition of these terms are provided below. However, a more thorough understanding and other educational information important to know about these terms are provided in the Vaccination Detoxification Procedures.
 - a. **Downloads** - The downloads are the **hands and feet**. Toxic substance that the body is unable to remove will in time settle in some tissue of an organ or gland. However, while these toxins are still loose and circulating, gravity and movement of the arms and legs will also cause toxins to continue moving downward until they settle in the hands and feet, instead.
 - b. **Downloading** - The term “downloading” refers to the **“process”** of the toxins from their point of entry (such as any of the body openings) or their origin within the body (such as decayed cells, germs, metabolic by-products, etc.) as they are moving or “downloading” towards the hands and feet (downloads).
 - c. **Uploading** – The term “uploading” refers to what happens when the downloads (hands and feet) become so full of toxins that they have no room

for more, thus when toxins reach the hands and feet they settle instead in the wrists and ankle areas, then upload from there as they lock into tissue in reverse order. For example, from toes to foot to ankle to lower part of the lower leg to the upper part of the lower leg, and so on. .

- d. In time, not only does a person have swelling, pain, and deterioration of the muscles, joints, bones and tissues in the hands and feet, but this also begins to occur in the wrists/ankles, moving upward in the body.
 - e. Examples of the above is when it is difficult to open a tight lid on a jar that you use to be able to open with sufficient effort, Carpal Tunnel, Bunions, etc., just to name a few. Carpal Tunnel is caused by both toxicity and deficiencies.
6. **Scars (Injury or Surgical), Tattoos and GV-20 (Crown of Head)** – To dissolve these scars, following instructions in this document titled, **Medi-Body Pack – Bath – Soak Instructions**. Which area and when to apply is provided on the **Skin Target Schedule**.
 7. **Vaccination Puncture Sites (VAC)** – When the **Skin Target Schedule** indicates Vaccinations (**Vac**) for Arms (Deltoid Muscle) and Buttock, follow the **Vaccination Detoxification Procedures**. Toxins in vaccines lead to some major downloading, so you will be mineral packing more than just the puncture site where the vaccine was administered.
 8. **GV-20 (Crown of Head)** – Though GV-20 is not a scar, it is an area that will be mineral packs at the same time as a scar, tattoo, vaccination site or detox organ to re-establish its polarity and connection between the brain and the area that has suffered due to the obstruction of the scar, tattoo, etc.
