INSTRUCTION ATTACHMENTS

- Supply List - IF Pack - Scar Detoxification (this document)** – provides list of all therapeutic products, supplies and quantities.
- IF Pack Instructions** – provides all the instructions to complete IF Scar Detoxification.
- Scar/Trauma Chart** – Client's Copy for Visual Aide of scars (injury or surgical) and tattoos to apply Medi-Body Pack Mineral Mud.
- IF Pack Diagrams** – Body Images for examples of "paired" site to mineral pack with each corresponding IF site.
- Toxic Focal Sites** – Body Images where toxins gather – cover these areas when IF is above or to the left or right of the toxic focal site. It may also serve as a Visual Aide for areas to apply Vaccination and Castor Oil Packs.
- Castor Oil (CO) and Castor Oil-Immune (COI) Pack Procedures** – How to Use the Castor Oil products and supplies for detox organs and other purposes when products are included on this Supply List.

GETTING LOW ON PACKING PRODUCTS? This form is used to calculate the number of packing products required to complete the mineral packing of all Interference Fields (IF), their paired sites, and the four downloads indicated on the Scar Trauma Chart, as well as the 10-day Medi-Magna packing of all IFs that are severe (i.e., five years or older). Obviously, it is not possible for exact calculations to be made due to factors, such as the fact that the Scar Trauma Chart does not allow for exact measurements of each IF, spillage and other factors. Therefore, should you determine you are getting low in the amount of products initially provided, you may also use the information below to determine which products and their quantity to reorder or call our office and Dr. Smith will be glad to do this for you. To determine this you will need to know the number of Interference Fields (Scars, Tattoos, Piercings, Vaccinations Sites, etc.) X 2 (for their paired sites) that you have not yet packed.
