

# TOXIC FOCAL SITES

Date: \_\_\_\_\_

Name: \_\_\_\_\_

Note: The following chart shows common toxic focal sites of the body. Over time, these areas can often bio-accumulate a broad range of metabolic and environmental toxins, which can act to block the normal energy flow of the meridian network of the body. Thus perpetuating illness and preventing complete recovery.

The focal sites that you will be mineral packing as part of your Scar Detoxification Program will be highlighted with a colored marker. Please refer to your Skin Target Schedule for when to mineral pack your specific focal sites.
